Personal Projects

LocalQuaker: github.com/tahmidshahriar/LocalQuaker

- Developed a Django website to provide a platform for students of University of Pennsylvania to buy/sell items.
- Website posting restricted to only Penn students. The items were divided into a number of data structures for faster loading time.

Penn Course Review 2.0:   github.com/tahmidshahriar/PennPCR2

- Developed a Django website which uses an API to access database of all Penn courses and professors and stores them after sorting.
- Website allows Penn students to access the sorted database of professors and courses and leave reviews/comments.

Penn Chores: github.com/tahmidshahriar/PennChoresProject

- Developed a Django website for Penn students to post/accept chores.
- Automatically mails contact info to both party once a chore is accepted and removes jobs by itself once it has been declared complete.

Java Game: Football: github.com/tahmidshahriar/Football–Java

- Developed a small game which allows players to play a game of 2D virtual soccer as a goalkeeper.
- Game keeps track of high score and rewards points/penalties depending on the game timer.

Java Game: 2048 Clone: github.com/tahmidshahriar/2048-Java

- Developed a 2048 clone with added features to create a new experience while maintaining the logic behind 2048.
- Added features include time penalty, boosts, and local high scores.

Currently Working On:

- Currently working towards making an iOS app to create a social network dominated through business cards to help professionals stay connected better than before.

Past Experiences

Intern at Fashion Makers LTD   May 2014 - Aug 2014

- Responsible for creating a website to allow the executives to access all data of all the garments that the factory is currently working on
- Responsible for seeking out candidates for jobs and using social media to spread awareness of open positions at the company.
